Keith Hyde

SENIOR LINUX INFRASTRUCTURE ENGINEER

eagled913@gmail.com | South Florida

PROFESSIONAL SUMMARY

Senior Linux Infrastructure Engineer with 15+ years managing mission-critical Linux infrastructure in enterprise and cloud environments. Leads fleet operations across 1,000+ nodes, with deep expertise in RHEL/CentOS engineering, kernel tuning, filesystem management, and sysctl and security hardening. Designs and operates enterprise storage and high-availability platforms — SAN/NFS, VERITAS Volume Manager, and clustered filesystems — and drives consistency at scale through Ansible and Chef automation for platform state, patching, and lifecycle management. Proven record leading global operations, incident response, and cross-functional teams across multi-region Azure and hybrid environments, with strong experience in Kubernetes and OpenShift, infrastructure as code, monitoring, backup, and disaster recovery.

TECHNICAL SKILLS

Linux & Operating Systems: Linux (Red Hat Enterprise Linux, CentOS, Fedora, Ubuntu) — kernel tuning, XFS / EXT4 filesystems, sysctl and security hardening | Solaris 8 / 9 / 10 | HPUX | Windows Server

Storage, High Availability & Platform: VERITAS Volume Manager & Cluster Server | Storage Area Networks (SAN) / NFS | Clustered filesystems | Sun Cluster 2.0 / 3.0 | Solstice DiskSuite | Veritas NetBackup | BMC Control-M (batch scheduling)

Automation & Infrastructure as Code: Ansible | Chef | Terraform | ARM Templates | Azure DevOps | Jenkins

Cloud & Containers: Microsoft Azure (IaaS, PaaS, SaaS) | Kubernetes | AKS | OpenShift | Container orchestration | Google Cloud | AWS

Monitoring & Observability: Nagios | Cacti | Azure Monitor | Log Analytics | Grafana | Splunk | RRDTool

Scripting & Programming: UNIX Shell Scripting | Python | Perl | C | C++ | Java

Services, Directory & Databases: BIND 8/9 DNS | Apache | ProFTPD | OpenLDAP | iPlanet / SunOne | Postfix | Qmail | Sendmail | Communigate Pro | Microsoft Exchange | ClamAV | Kaspersky | SpamAssassin | MailScanner | Oracle & MySQL administration

PROFESSIONAL EXPERIENCE

Amadeus NA — Miami, FL — Jan 2015 – Present

Senior Linux Administrator (SRE/DevOps Lead)

Global leader in transaction processing and booking systems for the travel and tourism industry, serving airlines, hotels, travel agencies, and airports worldwide.

- Lead Linux infrastructure operations for global platforms with 24/7 availability and strict SLA compliance across multi-region Azure and hybrid environments.
- Design, install, configure, and maintain RHEL/CentOS systems, including kernel tuning, filesystem management (XFS, EXT4), and sysctl / security hardening.
- Administer enterprise storage (SAN/NFS), VERITAS Volume Manager, and clustered filesystems for high-availability data services.
- Implement configuration automation with Ansible and Chef for consistent platform state and patching across 1,000+ nodes.
- Manage patching, upgrades, and lifecycle management with minimal downtime via maintenance windows and rolling updates; maintain runbooks for patch cycles, disaster recovery, security incident response, and capacity planning.
- Strengthen monitoring with Nagios, Cacti, Azure Monitor, and custom shell/Python scripts; lead root-cause analysis, postmortems, and remediation; serve as primary operations contact for mission-critical Inventory and Availability systems.
- Build and operate Linux container hosts and OpenShift clusters with security controls and platform resilience; architect solutions using Azure IaaS, PaaS, and SaaS; deploy infrastructure as code (ARM Templates, Terraform, Chef, Ansible); implement CI/CD with Azure DevOps and Jenkins; perform risk assessments and production change planning; mentor junior administrators; participate in 24/7 on-call rotation.

Amadeus NA — Miami, FL Sep 2011 – Jan 2015

Systems Engineer – Application Management

- Primary operations contact for Inventory and Availability systems; led application implementations across test and production environments.
- Conducted risk assessments for infrastructure changes and managed production change planning and implementation.
- Provided incident support and root-cause problem management; interfaced with development teams on application projects.
- Developed UNIX shell scripts to streamline daily operations; delivered technical presentations; participated in on-call rotation.

Amadeus NA — Miami, FL Aug 2008 – Sep 2011

Systems Engineer – GOS (Global Operations Support)

- Supported applications in the Airline IT environment critical to travel distribution; managed BMC Control-M automated batch scheduling.
- Managed deployment of application releases and updates; developed shell and Perl scripts for monitoring critical system components.
- Administered MySQL databases; performed performance optimization, capacity planning, and disk space management.
- Built real-time graphical representations of airline data using Round Robin Database (RRD); created documentation and procedures for cross-functional teams.

World Fuel Services — Miami, FL Aug 2007 – Jul 2008

UNIX Administrator

Global energy management company providing fuel, lubricants, and renewable energy solutions to aviation, marine, and land transportation in 200+ countries.

- Administered Solaris 8/9/10 and Red Hat ES 4.0/5.0 across production, QA, development, patch, and disaster recovery environments on diverse Sun hardware.
- Implemented Solaris build and patch procedures using Jumpstart, LiveUpgrade, and Flash archiving for high-availability, mission-critical services.
- Administered VERITAS Volume Manager, VERITAS Cluster Server, and Solstice DiskSuite; managed backup strategy with Veritas NetBackup 5.0 across multiple data centers.
- Optimized Solaris systems for Oracle Database and Oracle Application Server performance; monitored and forecast server performance; configured Nagios for servers and critical applications.
- Developed UNIX shell and Perl scripts for routine system administration tasks.

Cable & Wireless — Jamaica Oct 2006 – Jul 2007

Internet Administration Manager

- Coordinated design and implementation of new applications and system integrations; managed CAPEX spending aligned to business plans and efficiency.
- Analyzed operational performance reports and recommended resource optimization; produced monthly platform availability and utilization reports for Operations Management.
- Trained staff for increased responsibility; liaised with hardware and software suppliers for support and cost-effective maintenance contracts.

Cable & Wireless — Jamaica
Dec 2001 – Sep 2006

Senior Internet Server Administrator

- Provided administration for ISP environment hardware and software; designed, configured, and implemented email, DNS, RADIUS, LDAP, and FTP server solutions.
- Installed and maintained Red Hat ES/AS 3.0/4.0, CentOS 4.0, Fedora Core, and Solaris; administered VERITAS Volume Manager, Sun Cluster 2.0/3.0, and Sun-based Storage Area Networks.
- Integrated open-source solutions to enhance performance and reduce capital costs; developed shell and Perl scripts for administration and monitoring.
- Configured Nagios and Cacti for server, router, and ADSL DSLAM monitoring and performance tracking; supported NOC teams, developers, customers, and business stakeholders.

Cable & Wireless — Jamaica
Jul 1998 – Nov 2001

Internet Server Administrator

- Administered email, DNS, RADIUS, LDAP, and FTP servers; managed Oracle and MySQL database systems.
- Administered VERITAS / Sun-based Storage Area Network systems; installed and configured Linux and Solaris across hardware platforms.
- Implemented backup and recovery solutions (weekly full and daily incremental backups); liaised with vendors for support and maintenance.

Cable & Wireless — Jamaica
Oct 1990 – Jun 1998

Telephone/Data Installation Technician

- Installed and maintained residential and business telephone systems, Frame Relay, ISDN, and ADSL data circuits, and telephone cable distribution systems.

EDUCATION

Master of Science, Computer Science — University of the West Indies, Mona Campus, Jamaica (2005)
Special areas: Operating Systems, Capacity Planning, Database Systems

Bachelor of Science, Computer Science / Electronics — University of the West Indies, Mona Campus, Jamaica (2000)
Upper Second Class Honours

CERTIFICATIONS

Azure Certified System Administrator — 2024

ITIL v2 Certified — 2009

Solaris 8 Certified Network Administrator (SCNA) — 2003

Solaris 8 Certified System Administrator (SCSA) — 2003
